                          │   mkDirStruct   │
                          └─────────────────┘
```

- `image1`.img → Read image → disk [255] → block → mkDirStruct

- WriteDirStruct()

- FindEscCreatWithName() — name → CheckLegalName() — Torf

- CheckLegalName()

- cpmDir()

- MakeFreeList() → FreeList[]

- Free list array → printFreeList()

- cpmRename() — Index → FindEscCreatWithName()

- cpmDelete() — Index → FindEscCreatWithName()

CPmdelete → disk (with bytes value of 0)
